

We are committed to becoming a world class safety leader. In an effort to achieve this, the company has implemented a Contractor Safety Management Program. This program will be applicable to contracts with Nalcor Energy, and it's subsidiaries, including Newfoundland & Labrador Hydro, Churchill Falls, and Bull Arm Fabrication.

Through the application of this program, we will identify potential risks associated with a project, and implement remedial action plans to remove or minimize the identified risks. This is being achieved by working with tender respondents, and other contractors early in the process to identify those areas of concern requiring remedial action.

An integral part of this program is our Worksheet C, "Contractor Safety Qualification Questionnaire" which is included in all applicable tender documents, and must be completed. The Contractor Safety Management Program is typically not applicable to 'supply only' tenders.

Please ensure that you thoroughly read each tender document to ensure you have included all required information in your tender submittal. We will not accept submission of the required information after the tender closing date and time. If you are faxing a bid response, please ensure the required information is included in your faxed tender submittal.

Should you require any further information, please do not hesitate to contact us @ (709) 737-1335.
